

2018 Texas Symposium on Wireless and Microwave Circuits and Systems (WMCS)

Call for Student Posters

Deadline for Abstracts: Wednesday, March 28, 2018 (7:00 p.m.)

The 2018 Texas Symposium on Wireless and Microwave Circuits and Systems includes a Student Poster Session for both graduate and undergraduate students. The poster session will allow the student presenters to present their posters and interact with the symposium attendees, including other students, faculty, and industry representatives. Awards will be given for the best poster presentations.

It is not necessary for students to have an oral presentation at the symposium in order to have a poster presentation. However, students who have an oral presentation at the symposium are also invited to have a poster presentation on the same topic if they wish, which will allow them to interact with the attendees more fully on their topic and to participate in the poster competition.

Student poster presenters are asked to submit a one-page abstract, which will be published in the conference booklet but will not be published in the conference proceedings on IEEE Xplore, allowing subsequent submission of this material to future conferences (this conference or others) that archive on Xplore. Please use the template provided on this website for preparing the abstract, and email the completed abstract (as a Word document) to Prof. David R. Jackson at djackson@uh.edu by the deadline of 7:00 p.m. on Wednesday, March 28, 2018.

Poster boards will be provided that measure 48 inches \times 48 inches, along with double-sided Velcro strips for fastening your poster to the board. Although there is no template or particular format that must be followed, it is recommended that you create your poster in landscape mode, with the poster being 48 inches (or less) in width and 36 to 48 inches in height. Please make sure that your poster will fit on the poster board. Students should bring their posters with them to the symposium and have their posters fastened to the boards in the poster room in time for the start of the poster session.

Prizes will be awarded for the three best student posters: **\$600**, **\$500**, and **\$400** for first, second, and third place winners (in the form of Amazon gift cards). Students are therefore encouraged to do their best in the preparation of their posters and in their discussions with the attendees/judges!
